- 3 Getting Started
- 4 Why New Bridge Capital Investment?
- 5 Testimonials
- 6 FAQs

In 1971, the U.S. Dollar was taken off the gold standard by former president Richard Nixon. This decision was not a small one and had immediate consequences as more and more U.S. Dollar notes were printed without being backed by any real value. From 1971 to 1985 the U.S. Dollar experienced an average inflation rate of 7.05% yearly. There was a problem and a solution was required.

New Bridge Capital Investment was formed in 1988 by 10 founding partners with one basic goal, to beat the inflation rate and to build wealth in the process for the firm and its partners through investments in financial instruments that are not readily available to the general public or are too sophisticated to be understood by them.

Different wealth-building strategies have been proposed by many wealth experts and gurus. Some of them are to keep your money in an index fund for 40 years to see some good returns. We have never been fans of this school of thought because nobody's money is safe in the bank, the government could wake up one morning and pass a law that would render every "cash" millionaire poor.

"if you don't find a way to  
make money while you sleep,  
you will work until you die"

**- Warren Buffet**

“Investing is simple,  
but not easy.”

## Our approach

We believe investing involves choosing the right asset/instrument at the right time. When New Bridge Capital Investment was formed, the first wealth-building vehicle we chose was Crude Oil, because the Crude Oil market was experiencing an increasing demand then. Over time we have chosen assets based on the market conditions and we have made billions investing in the Stock market, the internet during the dot-com boom, and Real Estate. In the last decade, we have picked significant interest in the cryptocurrency market as our major wealth-building vehicle. Cryptocurrencies like Bitcoin are decentralized and only have a limited supply, this is good because, unlike cash, more Bitcoins cannot be printed or created hence guaranteeing infinite profit potential in the long run.

Because of the blockchain technology that cryptocurrencies operate on, we can develop algorithms and automated systems that allow us to take advantage of this technology to make profits daily. Also, because of the decentralized nature of crypto, we can make sure that we can make our investors direct participants in market profit shares unlike banks to generate a consistent 0.1 - 2% daily profits.

With the advent of cryptocurrency and currency decentralization in the last decade, we chose to make New Bridge Capital Investment open to new partners, strictly by referral from existing members. Our goal with this was to gain more market share in the market and therefore gaining more control over price movements and consequently expanding the firm's portfolio balance and making profits for all our growth partners. We have decided to take out all the mumbo-jumbo technical details and to simplify the art of investing for all new members including an aspiring investor with no financial background. This simplification includes a user-friendly interface where users can just create accounts, make deposits and let the firm take care of all the technicalities involved. We have a competent team of engineers, financial analysts, and algorithms that help generate consistent daily profits for all our investors. Our 'behind the scenes' work helps eliminate ambiguity and allows our investors to focus on growing their investment account balance. There is a lot of information out there on investing and different approaches to it, this can easily confuse a beginner who just wants to get started. New Bridge Capital Investment is meant for those who want to make passive income through investing without having to study every single piece of information out there or deal with the complications that come with using complex algorithms. We have simplified this by allowing users to make instant deposits and withdrawals to and from their accounts using cryptocurrency.

New Bridge Capital Investment wishes to welcome you, our growth partner, into our small community of like-minded individuals.

# GETTING STARTED

Joining New Bridge Capital Investment is strictly by referral by an existing member or an affiliate. You are required to provide your personal information to get registered. You will receive a welcome e-mail and would be assigned a Personal Advisor (P.A). The job of your P.A is to help you come up with an investment plan that would suit your current needs. You are therefore expected to share as much as you can with your P.A with regards to your your current financial situation, what your goals are, and how soon you want to archeive them. New Bridge Capital Investment uses the **IDEX20SPARK** software to automate your investments and your returns. This software needs to collect parameters such as how much you will be investing as your base capital, the frequency of your deposits, and the number of cycles you would like to invest.

## Making Deposit

Deposits at New Bridge Capital Investment are made via Bitcoin. All our users are expected to have bitcoin wallets and accounts with bitcoin exchanges that will allow them to buy bitcoin that is equivalent to the dollar amount they intend to invest. For new users, your P.A would be available to guide you through the entire process. When your account is registered, a bitcoin wallet address is automatically created for you, this will serve as your New Bridge Capital Investment wallet account, all Bitcoin payments are expected to be made into this address.

## Withdrawals

You can only make a withdrawal request after your investment cycle is completed. The firm is entitled to 15% of the profits made on your account and would be withheld upon withdrawal. We offer two types of withdrawals, Bank withdrawal, and Cryptocurrency withdrawal. Most of our new partners use the cryptocurrency withdrawal method since they should already have crypto wallets by the time of withdrawal. Your Funds available for withdrawal will be displayed on your account dashboard at the end of your investment cycle. When you request for a withdrawal, an email would be sent to the email(s) attached to your account to confirm your withdrawal request before the transaction would proceed.

# GETTING STARTED

## BASE CAPITAL (B.C)

Your base capital is the amount you choose to start your account with. We currently have four investment levels on our firm, Bronze, Silver, Gold, and Diamond level and your base capital determine which level you fall in. There are different perks for each level which include wider investment spreads across different assets, faster and bigger returns, and also quick access to any new premium features the firm decides to implement.

## INVESTMENT FREQUENCY (I.F)

Your investment frequency is how often you wish to deposit into your account. For example, you could deposit a minimum of \$5,000 into your account in addition to your base capital every week. This parameter should be specified to your Advisor as it can not be changed after your cycle starts.

## LEVERAGE AND HOW IT WORKS

To make sure that we can give you the kind of returns that we do, we use the leverage from our bank reserves. When you invest with us, the leverage taken on your account is calculated as follows;

$$\text{Total Investment} = \text{B.C} + (\text{I.F} \times \text{total number of weeks})$$

$$\text{Leverage} = \text{Total Investment} \times 15$$

For example,

If you choose to start with a base capital of **\$15,000** with an investment frequency of minimum **\$1,500/wk** for a cycle of **32 weeks** your Total Investment would be **\$15,000 + (\$1,500 x 32) = \$63,000**.

We then use our leveraging system to control more capital from our reserves with your total investment.

For the above example, your leveraged investment would be **\$63,000 x 15 = \$945,000**

Your account is then traded with the leverage amount from our reserve. instead of trading with the above **\$63,000** a total of **\$945,000** is invested. The investor's account now controls **15x** of his original investment.

N.B: Without our leveraging system, we would not be able to promise the kind of daily returns that we do. As a result, you have to complete your weekly contributions by the end of your cycle to be able to withdraw your profits because once your account parameters have been plugged into our software, the leverage is taken automatically.

Why New  
Bridge Capital  
Investment?

## Why should you become part of New Bridge Capital Investment ?

**1**

### Investing Made Simple

At New Bridge Capital Investment, we have decided to take out all the technicalities that come with investing, like choosing the right asset, when to buy or when to sell. We have taken that responsibility off the shoulders of our investors who can now focus on growing their account balance. Your investment is spread across different assets, insured by the FDIC and regulated by the SEC. Our users can now make deposits, log in daily and see their investment grow.

**2**

### Earn Passive Income - Daily!

Investing with New Bridge Capital Investment means you get to let your money work 24/7 for you.

Your money is been put into assets that will generate income for you on a daily basis earning you anywhere between 0.1 – 2% of profits in a single day. The more actively you invest, the more you earn.

**3**

### Return on Investment

A good investment should give you great returns in the shortest time possible. Unlike your regular 401K's, IRA's, Mutual Funds, and Savings account that barely make a 4% annual return for the customer after inflation because of the intermediary parties involved, you get to make much more because of the direct nature of our investments. You get to earn daily, and anywhere from 100 – 150% returns at the end of any investment cycle period.

Why New  
Bridge Capital  
Investment?

Why should you become part of  
New Bridge Capital Investment

**4**

### Fast & Secure

Investing with us is quick and easy because of our cryptocurrency integration, you can make a very large investment in a short time without any hassle. Your money is secure as the firm is. Insured by the FDIC and regulated by the SEC.

**5**

### Customer Support

Every growth partner at New Bridge Capital Investment enjoys full-time 24/7 support from our team. You can have a live chat with our customer support team on the website. After your registration, you are also entitled to a Personal Advisor (P.A) who will guide you through your investments, how to go about them, and also help you make good decisions on how much and how often you should make deposits into your account based on your financial background and your needs.

## SEE WHAT OTHERS THINK

“The constant support I received from my advisor was what I loved about the most about using New Bridge Capital Investment.”  
- Michelle

“We were able to clear our debt, and save up for our son's college.”  
- David & Sarah

“I was able to pay off my house and raise money for my restaurant business in less than 18 months of using New Bridge Capital Investment.”  
- Flint

“The idea that I could make consistent passive income by just putting my money to work is still a shocker to me, Lol.”  
- Ruth

## **FREQUENTLY ASKED QUESTIONS (FAQS)**

---

### **How much should I invest with for a start?**

This is a personal decision. A Personal Advisor would be assigned to you to collect as much information as possible from you to help in your decision-making process.

### **How long does an investment cycle last?**

An investment cycle lasts for 4 months, you can choose to invest for 2 or more cycles depending on your needs.

### **How much profits should I expect at the end of an investment cycle?**

It depends on the market conditions during the cycle as a lot of factors could affect how much profits you will make. You can expect anywhere from 0.1 – 2% profits daily and 120 - 150% total profits in an investment cycle.

### **Can I make a withdrawal before the cycle ends?**

No, our system is automated so you cannot change the parameters on your investment once it has been registered on the system until the investment cycle ends. However, you can have multiple accounts with different parameters.

### **What are my Investment Parameters/Specifications?**

Your Investment parameters include your base capital, deposit frequency, and the number of cycles registered for.

### **What happens if I miss my weekly payments?**

You can always make up for missed payments. But you have to complete payments for your investment cycle to be complete.

### **My investment cycle is complete and I can not make a withdrawal yet**

Funds will be made available for withdrawal shortly after your cycle is complete. If you still don't have funds available for withdrawal, please leave us an email or reach out to your P.A, it could be because you have not completed the weekly payments registered on your account or you have your ID Verification pending.

## **FREQUENTLY ASKED QUESTIONS (FAQS)**

---

### **How does my investment Base Capital affect my account?**

Your base capital affects what level you are in the firm. The bigger your base capital the more leverage that can be taken on your account to invest. It also gives a lot of room for the number of assets we can spread your investments across which leads to a faster and bigger return on investment.

### **How does my investment frequency affect my account?**

Your investment frequency allows for more leverage. When you indicate your account parameters such as your investment frequency, it is summed up with your base capital and is used to take leverage from our reserve.

### **Can I own multiple accounts?**

Yes, you can own multiple accounts set with different account parameters.

### **Is New Bridge Capital Investment a Ponzi Scheme?**

No, New Bridge Capital Investment operates as a Hedge Fund/Private Equity that pools funds from investors leveraged with its bank reserves to invest in high yield assets, and make profits for the firm and its investors.

### **I can't find your social media pages**

We are currently working on that and you would be able to find on Facebook, Instagram, LinkedIn and Twitter soon.

### **How do I make a deposit?**

You can make a deposit via cryptocurrency by using an exchange to buy Bitcoin and send it to your account address on New Bridge Capital Investment. Your P.A would recommend a number of these trusted exchanges to you.

### **I sent Bitcoin into my New Bridge Capital Investment account but it's nowhere to be found**

Sometimes the blockchain network is slow in verifying payments. If you still can't find your deposit on your account please reach out to our support team or to your P.A.

## **FREQUENTLY ASKED QUESTIONS (FAQS)**

---

### **Can I make deposits via wire/bank transfer?**

Yes, we accept bank and wire transfers for deposits over \$10,000 if you have difficulty buying Bitcoin.

### **How long does it take for my deposit to reflect on my account on New Bridge Capital Investment?**

2 – 12 hours for Bitcoin deposits and 2 - 3 business days for bank transfer.

### **Why does New Bridge Capital Investment receive deposits via cryptocurrency?**

It's faster and syncs better with our automation.
